Post Graduate Opportunities at Swinburne University of Technology

This talk is aimed at students who would like to further their studies at Australia universities especially in Swinburne University of Technology. A variety of postgraduate courses and research scholarships are available. The talk will provide student with informative and relevant information regarding some of the research activities at the Faculty of Engineering and Industrial Sciences in Swinburne. For more information regarding scholarships, please visit the following website:
http://www.research.swinburne.edu.au/higher-degrees/scholarships/

One of our recent chemistry graduates, Ms. Gan Jo Ann was offered a PhD candidature together with a Swinburne University Postgraduate Research Award (SUPRA), which is a full scholarship that will fund her three years study in SUT starting in July 2009.

Presenter

Dr YC Wong is a Senior Lecturer with the Faculty of Engineering and Industrial Sciences in Swinburne. He was a former student of TAR College and after completed his Diploma in Technology he migrated to Melbourne, Australia in 1990. He then furthered his studies at Swinburne and completed his Bachelor, PhD and Graduate Certificate at Swinburne. He joined as member of staff of the university since 1996. Dr Wong completed his PhD in the area of plasma nitriding and physical vapour deposition. His other research areas of interest are metal cutting, grinding and water-jet cutting. Recently, he has also been awarded two Visiting Fellowships by Akita Prefectural University, Japan which enabled him to focus in the research of magnetic fluids. He has published over 40 papers in both journals and conference proceedings.

Time: 2.00 pm

Date: 15th April, 2009, Wednesday

Venue: SE 111

Speaker: Dr. YC Wong, Swinburne University of Technology
