2010 Schneider Electric University Challenge - “Green the World”.

Briefing date: 7/7/2010 (Wednesday)

Venue: DK2A

Time: 2-4pm

The objectives of the competition are shown below:

- To promote to the future generation energy efficient solutions for significant and sustainable savings.
- To unleash and encourage the undergraduates’ creativity and innovativeness in developing energy efficient proposals for the campus / college / university
- To establish a symbiotic and healthy relationship between the Universities and Schneider Electric which will help facilitate learning opportunities for the undergraduates.

Advantages of participating in this competition are:

- Being trained on Schneider Electric’s Energy Efficiency (EE) solutions and most importantly be exposed to real-life scenarios that can be applied.
- A scholarship fund worth RM15,000, opportunity to travel abroad and training at Schneider Electric.
- No expenses is required of students or the universities.

For more information, please attend the briefing session.
