UDL is a Web-based application company that integrates academic information with full text theses, dissertations and journals. UDL offers an unmatched depth and breadth of validated content and data analysis tools giving universities convenient access to trustworthy sources at any given time. To further enhanced the application, UDL also offers a range of searches such as Refwork, Bookmark and Bookshelf. It helps you to create your own project and therefore users can locate the information needed without any hassle at all.

Digital library plays a crucial role in any research at higher learning institutions. Many publications are now available online and can be delivered to the end users quickly and conveniently over the internet. What separates UDL from any other online database, is the functionality software that we have embedded into the reference books. It help users find the data faster and productively apply it.

VISION, MISSION & QUALITY POLICY

VISION

◆ Universe Digital Library will be the leading global library cooperative by helping libraries serve the people in providing economical access to knowledge through innovation and collaboration.

MISSION

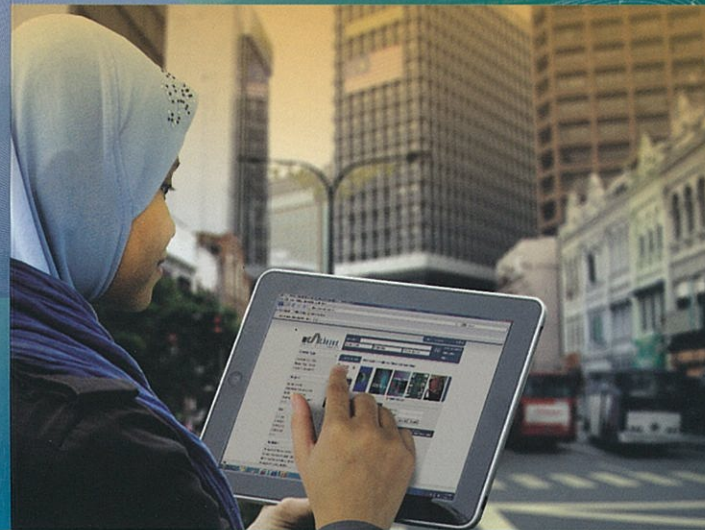

● Universe Digital Library exists to further access to the world's information and reduce costs by offering services for libraries and their users.

QUALITY POLICY

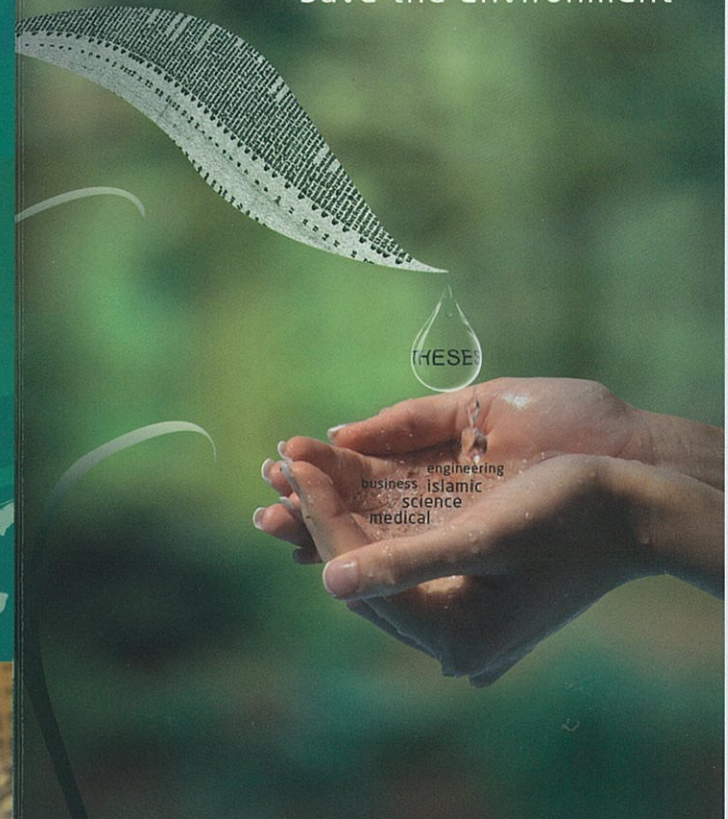

Universe Digital Library will continually improve the processes used to deliver its products and services to achieve its goal.

WHY USE UNIVERSE DIGITAL LIBRARY?

- 1 Has cool built-in software tools that manipulate and analyze information.
- 2 Eliminate worries about unreliable sources found on the web.
- 3 Available 24/7/365 from anywhere in the world.
- 4 Used by scientists, engineers, students and researchers.
- 5 No special software required. A web browser and an internet connection will do.
- 6 More than thousand of theses, dissertations & journals in its library.
- 7 Faster, easier, more reliable and provides relevant information. It saves your time.

Take the Knowledge
Keep the Paper
Save the Environment

“ We contribute to Malaysia's knowledge economy and society in several ways that creates high value content - for ourselves and for export. This strategy proposes a digital content innovation cluster wherein Malaysia can secure its place as a leader in the digital world. ”
