

Bachelor of Social Science (Hons) Psychology
KP/JPS(KA4114)6/09

The programme provides a broad and fundamental understanding of the role of psychologists in the Malaysian scenario within a global environment through case studies and industrial attachments. Students are trained to think critically and develop their analytical skills in preparation for their future careers as psychologists. Emphasis is placed on the relevance of the units of study to meet the changing needs of the Malaysia socio-economic environment. This programme also exposes students to alternative forms of counselling, such as e-counselling and traditional face-to-face counselling.

Career Prospects

Graduates can seek employment in welfare agencies, rehabilitation centres, hospitals, schools, colleges, community centres, non-governmental organisations and private sector companies.
