In the rise of Cyberspace, we have seen a devotion to technical security. The study of crime in Cyberspace has gained little support from the enormous information security industry. We need to increase the awareness and understanding among IT Professionals and Practitioners of the potential risk, impact and crime prevention in the cyberspace business environment.

The talk includes:

- Practical Tips on Cyber Security
- Cyber Security Incidents
- Common Cyber Crime Risks
- ICT Jobs in relates to cyber security
- Development in information security industry

All Students are Welcome !!
